

# Unlock Better Braking.

WiTi Wireless Electric Brake controller extends the functionality of your WiTi Anti-Theft System. Through trailer based braking, it uses a point-to-point wifi protocol to adjust the braking system of the WiTi Ant-Theft System.

## ✘ It Is Not

- ✘ **Bluetooth** - Weak signal that is easily disrupted
- ✘ **Vehicle based braking**
- ✘ **Difficult to install, or requires custom looms**
- ✘ **Fixed to the vehicle**

## ✔ It Is

- ✔ **Point-to-point WiFi** - Strong and direct connection to the WiTi Anti-Theft System that uses a closed network
- ✔ **Trailer based braking** - Our brake controller sends the signal to the WiTi Anti-Theft System to apply the brakes
- ✔ **Plug and Play** - No wiring, simply plug into a 12V socket, pair to your Anti-Theft and off you go
- ✔ **Compatible with modern vehicle technology** - Brake assist (EBA), AEBS

# The Only Truly Plug-and-play Solution

## Hill Descent Control

WiTi Hill Descent Control enhances braking by measuring the angle of descent and applying the brakes proportionally. The steeper the descent the more braking is applied resulting in a safer more controlled descent.

## Brake Smoothing

Brake Smoothing eliminates the sharp and annoying jolting that may occur with other brake controllers.
